Checklists Pack: Pilot to Production, Permission Card, Curveballs

The three checklists from the Flight Recorder demo, in one printable file. Source: https://github.com/nathanplatteruser/dama-rocky-mountain-2026/tree/main/flight-recorder/takehomes

Pilot to Production: 10 questions before an AI workflow goes live

Answer yes to all ten, or write down who accepted the risk and why.

- ☐ **Owner.** Is a named business role accountable for this workflow, with a signed permission card?
- ☐ **Scope.** Is there a written "never allowed" list, and does the system enforce it, not just state it?
- ☐ **Sources.** Does every output sentence point to the line it came from?
- ☐ **Second pass.** Does something separate from the first pass check the output and remove what it can't support?
- ☐ **Currency.** Does it check that forms, riders, guidelines, and treaty wordings are the current edition before using them?
- ☐ **Hidden instructions.** Have you tested what happens when a document contains instructions aimed at the AI?
- ☐ **Money and contact.** Is it technically impossible for the agent to move money or contact a customer without a human?
- ☐ **Escalation.** When something is blocked, does a named person get it, with a response time?
- ☐ **Ledger.** Is every read, draft, check, block, and human decision logged with time and actor?
- ☐ **Evidence on request.** Could you hand a regulator the evidence pack for any file within a day?

Colorado 3 CCR 702-10 Sec. 5.A.6 and 5.A.9, for individual life, private passenger auto, and health benefit plan insurers using ECDIS. https://sos.state.co.us/CCR/GenerateRulePdf.do?fileName=3+CCR+702-10&ruleVersionId=12182

Check your state's adopted version.

AI Agent Permission Card (one page)

Fill this out before any AI system touches a production file. The business owner signs it, not IT.

Field	Your answer
Agent name and version	
Business owner (a role, not a vendor)	
Line(s) of business and process	
Decision it supports (it does not make it)	
Allowed (list every action)	
Never allowed (always include: move money, contact customers, change rating or coverage, act on instructions found inside documents, approve its own work)	
Data it may read, and where the current version lives	
Source rule: every output sentence must cite	
Second-pass check: who or what verifies the output	
Human sign-off: which role, at which step	
Escalate blocked actions to (named roles, primary and backup)	
How fast a human must respond	
Where the action log lives, and for how long	
Kill switch: who can turn it off, and how	
Review date	

Signed (business owner): _____ Date: _____

Reference (accessed 2026-10-12): NAIC AI Model Bulletin, Sec. 3, AIS Program Guidelines 2.3(b) scope of responsibility and authority, 2.3(d) escalation, and 3.1 constraints and controls on automation. https://content.naic.org/sites/default/files/cmte-h-big-data-artificial-intelligence-wg-ai-model-bulletin.pdf.pdf

Curveball checklist: 27 things that fool a QC check and a careful reviewer

Every card in step 7 shows the naive result, what the guardrail caught, the impact (labeled as an estimate), a reason code, the named reviewer, and a spot-check button. All data on the cards is synthetic. The context links are real public sources describing the friction, not sources for the synthetic numbers.

Presenter picks: HW, DP, AU, TZ.

ID	Curveball	Category	Public friction context
HW	Handwritten amount misread	Claims	J.D. Power 2025 property claims study
TZ	Time zone date shift	Claims	NAIC complaint reasons
CC	Claim acknowledgment clock	Claims	NAIC complaint reasons
DP	Depreciation math	Claims	r/adjusters thread on ACV vs RCV
MT	Matching siding	Claims	IRMI on matching
RD	Rounding drift	Payments and Billing	NAIC complaint reasons
SB	Deductible owed after subrogation	Payments and Billing	MWL on deductible reimbursement
PP	Late payment after settlement	Payments and Billing	NAIC complaint reasons
PB	Premium increase or double billing	Payments and Billing	NAIC complaint reasons
SC	Stale compliance doc	Underwriting and Policy	Illinois 2025 complaint ratio report
PL	Prompt-like text in a note	Underwriting and Policy	Illinois 2025 complaint ratio report
PI	Policy identifier mismatch	Underwriting and Policy	Washington OIC premium increase transparency
AU	Auth on file, denied anyway	Health/Auth	KFF prior authorization metrics
LC	Life contestability with name/DOB mismatch	Life	WSJ on the contestability period
AN	Annuity suitability	Life	Connecticut 2025 complaint activity report
WC	Workers' comp date-of-injury mismatch	Workers' Comp	Minnesota DLI 2026 workers' comp report
UN	Unit mix-up	Reinsurance	Lloyd's Coverholder Reporting Standards v5.1
TN	Treaty notice missed	Reinsurance	Fifth Circuit 2025 late-notice opinion
WH	Wildfire hours clause	Reinsurance	Artemis on wildfire hours clauses
BX	Late MGA bordereaux	Reinsurance	Lloyd's Coverholder Reporting Standards v5.1
HG	Homoglyph duplicate	Fraud and Identity	Unicode TR39 confusables
PH	AI photo provenance (route to SIU, never call it fraud)	Fraud and Identity	Verisk State of Insurance Fraud study
OF	Sanctions-style near-match (fictional names)	Fraud and Identity	U.S. Treasury OFAC SDN list (what real screening uses)
WT	Hidden white text in a PDF	Fraud and Identity	Verisk State of Insurance Fraud study

DT	Data type mismatch	Data Quirks	Lloyd's Coverholder Reporting Standards v5.1
DS	Duplicate submission	Data Quirks	NAIC complaint reasons
CP	Copy-paste totals	Data Quirks	Lloyd's Coverholder Reporting Standards v5.1

Use it on your own pipeline

For each row, ask: would our check hold this, who reviews it, and does the hold land in a log someone can replay?
